APH CVI Web Page – Revamped-Revised-Reworked-Restored

Announcing BIG changes on the CVI Website! Susan Sullivan, APH's CVI Project Leader has revamped the site to include new resources, literacy information, and suggestions for APH products appropriate for assessment and intervention. This website has been developed as an interactive resource with opportunities for educational team members to submit strategies that have been successful for them in working with children diagnosed with brain related visual impairments.

To explore, visit http://tech.aph.org/cvi or go to the APH website. Look at the menu choices on the left side of the screen. Scroll down to "Learn About Blindness" and click on the "CVI" tab. The website will be a continually-updated resource for vision teachers, parents, and all members of the child's team… so keep checking back! Click on the "Contact us" tab or email ssullivan@aph.org for questions, comments, or content sharing.
